Objective

To build efficient, scalable, and well-optimized systems that serve a real purpose, while continuing to grow in designing and engineering software end to end, from architecture through to production.

Experience

Associate Software Consultant Dec. 2025 – Present

Qestit *Egypt*

CIB T24 Core Upgrade Program — Interfaces Track

- Leading the Interfaces Track during the SIT phase, working with the bank's technical teams to map and validate how surrounding systems integrate with the T24 core.
- Working across T24's integration architecture: ESB middleware via **SOAP** APIs, direct T24 **RESTful** APIs, **MQ** (Message Queue), and file-based channels, designing test scenarios for each integration pattern.
- Verifying the behavior and data flow of integration touchpoints before and after the upgrade, tracing and documenting defects in JIRA.

Boubyan Bank — T24 Database Migration

- Validated the database migration from **iMAL to Temenos T24** through SQL-based data verification and reconciliation, building Python and JavaScript scripts to automate repetitive checks.

Freelance Software Developer Jul. 2024 – Present

Upwork & Direct Clients

Ambivio Bridge

- Designed and built a cross-platform Electron.js desktop bridge for **Ambivio** (a German medical startup), extracting data from intelligent on-hover screenshots to help doctors transition away from legacy systems.
- Architected a privacy-first inference pipeline around a local GPU-accelerated **Moondream2** model (Hugging Face) via Python, with automatic fallback to cloud inference when needed.
- Engineered a custom always-on-top floating widget with smooth animations, native full-screen capture and window metadata extraction (**C++/Python**), and real-time communication via **Socket.io**.

HST Website

- Built a full-featured camp management and reservation platform for Helio Sports Team, covering registrations, applicant tracking, customizable camp forms, and acceptance workflows.
- Integrated the **Kashier API** for secure online payments, supporting both full-payment and custom installment-based flows managed directly through the platform.
- Designed the backend on **Supabase** and **Supabase Edge Functions** for scalable data management, secure server-side logic, and real-time administrative operations.
- Integrated **MailerSend** for bulk email delivery and built a failed-email tracking system so administrators can resend messages or correct invalid addresses from the dashboard.

HST Interactive Games

- Built interactive mobile and desktop games for HST, including a real-world **RISK-inspired** strategy game and a **Jumanji-themed** quest game with QR-based challenges and location-based gameplay.
- Engineered real-time multiplayer synchronization with **Socket.io**, dynamic **Mapbox** maps, team/territory tracking, and an admin dashboard for managing game state and configuration.
- Integrated **React Viro** for augmented reality quests and **Firebase/Expo Notifications** for cross-platform real-time notifications and gameplay updates.

Client Projects via Upwork

- Delivered cross-platform applications for clients in **Germany, Lebanon, Australia**, and **Pakistan** across mobile, web, and desktop, using React, Firebase, Node.js, and Electron.js.
- Shipped production-ready apps that directly supported startups, such as a marketing site that helped an Australian client attract more customers.
- Built long-term client relationships through iterative releases and professional communication, earning **5-star reviews** and repeat contracts on Upwork.

React Native Developer Jun. 2025 – Aug. 2025

Quantech (Saudi Arabia) *Remote*

- Built multiple cross-platform mobile applications with multi-interface support, optimized for performance and a seamless experience across iOS and Android.
- Integrated RESTful APIs and implemented efficient state management with **Zustand**, improving maintainability and performance.
- Implemented **English & Arabic localization** with full **LTR and RTL support**, making the apps accessible to international users.

Freelance Training AI Models Oct. 2024 – Mar. 2025

Outlier AI, DataAnnotation *Remote*

- Evaluated and refined AI-generated code, technical responses, API calls, and English & Arabic responses for large language models, improving accuracy and performance.
- Developed challenging prompts designed to push AI models to failure, driving improvements in their reasoning and problem-solving.

Charge Support Intern Jul. 2024 – Aug. 2024

Vodafone *Smart Village, Egypt*

- Gained a solid understanding of Ericsson's charging server solutions, including SDP and AIR, while participating in a mini hackathon and professional development training sessions.

Projects

Motion Lab Sep. 2024 – Jun. 2025

- Built as my **graduation project**: a full-stack web app that extracts 3D motion from video (multi-person support) using MediaPipe for pose estimation and a PyTorch model for Z-coordinate recovery.
- Supports customizable character creation and dynamic retargeting of extracted motion to user-defined 3D avatars.
- Renders both BVH and GLB animations in-browser with Three.js, with exports compatible with Blender, Maya, Unity, and other animation tools.
- Offers a budget-friendly, trackerless motion capture alternative for animators and indie game developers.

Virtual Mouse May 2024 – Jun. 2024

- Built a virtual mouse system controlled by hand gestures, supporting movement, dragging, clicking, and scrolling.
- Used Kivy for the UI, OpenCV with MediaPipe for hand tracking, and TensorFlow for gesture recognition.

Bitcoin Price Prediction May 2024 – Jun. 2024

- Built a time series prediction pipeline for Bitcoin prices comparing multiple machine learning models.
- Applied Random Forest, SVR, XGBoost, ARIMA, and Prophet for predictions.

Education

Misr International University Cairo, Egypt

Bachelor of Computer Science, Major in Artificial Intelligence. (Honors, GPA: 3.4) *Oct. 2021 – Jun. 2025*

New Ramses College Cairo, Egypt

IGCSE, 99.4% *Sep. 2009 – June 2021*

Activities & Interests

Writing: Won 2nd place in the MIU English Short Story Competition 2023

Sports: Current Captain of Flicking Pharaohs, an Ultimate Frisbee team in Egypt

Volunteering: Member of Helio Sports Team and Focus Sports Camp 2023 & 2024 committees, organizing sports camps for juniors, youth, adults, and families.

Additional Information

Military Status: Exempted
